

HELLFIRE SECURITY

Managed IDS/IPS

WANT TO STOP ATTACKS BEFORE THEY ESCALATE, CATCH INTRUDERS BEFORE THEY DO ANY DAMAGE [HERE'S HOW](#)

"COMPANIES WHO TAKE PROACTIVE ACTION EXPERIENCE 40 PERCENT FEWER PROBLEMS THAN COMPANIES WHO DON'T"

" FIND THREATS IN YOUR ENVIRONMENT YOU ARE CURRENT MISSING"

MAKING THE MOST OF THE RESOURCES YOU ALREADY HAVE!

WHAT IS IT?

Managed Security Services is the monitoring and interpretation of important network events to detect hidden threats, and track down those that are attempting to do you harm.

WHO SHOULD HAVE IT DONE?

All businesses should have the control and capability that Managed Security Services brings.

CYBER SECURITY MAINTENANCE

- **Protection:** Regular updates to keep you protected you from the latest threats
- **Optimization:** Tuned sensors that only respond to relevant events

CYBER SECURITY MONITORING

- **Discernment:** Analysis by experts, not operators, who only deliver confirmed incidents
- **Focus:** Prioritized so that you only spend time on events that are most meaningful to you
- **Expertise:** Complete with action plan so that you know what to do next
- **Visibility:** Allowing you to know what's happening behind the scenes
- **Awareness:** And avoid later problems
- **Results:** Responding to events early and in the best possible way to prevent loss
- **Savings:** Combine that with the cost reduction your focus brings and you get a lot more money to spend on other things
