

HELLFIRE SECURITY

SecureSite

WANT TO PROTECT AGAINST DEFACEMENT, BAD PUBLICITY, AND LOST REPUTATION [HERE'S HOW](#)

"GIVE APPLICATION DEVELOPMENT AND SUPPORT TEAMS THE BREATHING ROOM THEY NEED"

"COMPANIES WHO TAKE PROACTIVE ACTION EXPERIENCE 40 PERCENT FEWER PROBLEMS THAN COMPANIES WHO DON'T"

IT'S BETTER TO BE PROACTIVE THAN REACTIVE!

WHAT IS IT?

SecureSite is a web application firewall that controls the input and output of your web site and it's supporting applications in order to monitor and potentially block harmful or threatening events.

WHO SHOULD HAVE IT DONE?

All businesses should have their websites protected by a web application firewall.

CYBER SECURITY MAINTENANCE

- **Protection:** Regular updates to keep you protected you from the latest threats
- **Optimization:** Tuned regularly to match the needs of your application

CYBER SECURITY SAFEGUARDS

- **Shields:** Scrubs incoming connections of abnormalities to prevent common types of attack and exploitation
- **Protects:** Provides your teams the time they need to resolve application issues
- **Expertise:** Complete with regular intelligence
- **Visibility:** Allowing you to know what's interests attackers
- **Awareness:** And avoid later problems
- **Results:** Responding to issues early and in the best possible way to prevent loss
- **Savings:** Combine that with the cost reduction your focus brings and you get a lot more money to spend on other things
