

HELLFIRE SECURITY

Social Engineering Testing

WANT TO FIND WHO'S PUTTING YOUR COMPANY AT RISK **HERE'S HOW**

"DATA BREACHES COST BUSINESSES AN AVERAGE OF \$202 PER RECORD EXPOSED WHICH CAN ADD UP TO MILLIONS OF DOLLARS PER BREACH"

"OVER 30% OF CUSTOMERS SAY THEY WILL TERMINATE THEIR RELATIONSHIP WITH A COMPANY THAT LOSES THEIR INFORMATION"

DON'T BE TOLD YOU'RE SECURE, KNOW THAT YOU'RE SECURE!

WHAT IS IT?

A Social Engineering Test is a simulation of a real-world attempt to phish, or extract, important information from your team in order to identify who engages in risky behavior before they are exploited by hackers.

WHO SHOULD HAVE IT DONE?

If you've got more than a just a couple of people in a home office, you should look into getting a Social Engineering Test done.

FIND OUT WHO IS PUTTING YOUR COMPANY AT RISK

- **Expertise:** Certified, experienced, and distinguished team
- **Visibility:** Learn what skills they are lacking!
- **Incentive:** Provide them with an incentive to be on the lookout
- **Budget:** Keep your support staff from being overwhelmed ... teaching them the skills they need to fend for themselves
- **Results:** For those that won't learn ... Know who you need to contain!
- **Growth:** Improve the security awareness of technical and non-technical staff

EVALUATION TIME AT YOUR COMPANY ...

- Is your team on the lookout for threats in their email?
- Would they be able to spot an attempted phishing?
- Do you know who would click on that link or open that attachment?
- Do you know the danger they are putting you in?
- Do you know what cyberskills would help them improve?
- Find out!
